CARING FOR YOUR BURRITOS

STORAGE & HEATING

DIS IS IMPORTANT

FROZEN DELIVERY CONFIRMATION INSTRUCTIONS

01 Check burrito temps immediately upon delivery and place in the fridge or freezer.

02 Do not refreeze thawed product. Do not sell or eat any product that arrives above 41°F.

03 Scan the QR code on the provided postcard (or visit disburrito.com/frozen-confirmation) to confirm if burritos arrived frozen.

TO QUALIFY FOR A CREDIT/RESHIPMENT: Temperatures must be submitted within 24 hours via the above. Late or incorrectly submitted reports will not be accepted.

REFRIGERATED STORAGE

Refrigerated/thawed burritos must be stored under 40ºF, and have a 10-day shelf life from completed thaw.

FROZEN STORAGE

Frozen burritos must be stored at or below 10ºF, and have a shelf life of up to 1 year from birth.

TRES VERDE SAUCE

Tres Verde Sauce is shelf-stable but should be refrigerated after opening and used within 10–14 days.

THAWING DIRECTIONS

Please note times are dependent upon air circulation and temp of your fridge or cooler. See Weekly Thawing Guide for more info.

OPTION 1 - OUT OF BOX: Place burritos on fridge shelf or sheet tray, spaced to allow for air circulation. Thaw for roughly 24 hours, depending on fridge's air flow.

OPTION 2 - IN BOX: Remove perforated top of case box. Place in fridge where air circulation is the strongest. Thaw time 2-3 days depending on air flow.

HEATING INSTRUCTIONS

PANINI OR GRILL PRESS

Place unwrapped burrito on pre-heated press until tortilla is golden brown. To decrease mess, use parchment paper.

FROM THAWED ONLY

- 450-500ºF (or max temp)
- 4-6min

PRO TIP: Microwave for 60 seconds first before placing on press.

AIR FRYER

Set to "air crisp" mode (or similar) and place the unwrapped burrito directly on the rack or tray.

THAWED	FROZEN
400ºF	315ºF
4-6 min	25 min

PRO TIP: We strongly suggest thawing burrito first. Heating from frozen is doable but not recommended.

TRADITIONAL OVEN

Place wrapped burritos directly on oven rack or tray with label on. If oven is full, rotate burritos half way through.

THAWED	FROZEN
350ºF	300ºF
20 min	40-50 min

PRO TIP: Adjust the cook time for convection ovens.

HIGHSPEED OVEN

Thaw before cooking. Remove from the wrapper and place on parchment. Place in oven vertically with the seam down.

FROM THAWED ONLY

500ºF	Microwave 90%
90 sec	Air 60%

PRO TIP: If center is still cold, increase cook time in 10 sec intervals. If burrito is too crispy, reduce air to 50%; if not crispy enough, increase air to 70%.

MICROWAVE (NOT OUR FAVE)

Slit the wrapper with one of our burrito openers to allow for proper ventilation and even heating.

THAWED	FROZEN
1.5 min	2.5-3.5 min

PRO TIP: Microwave thawed burrito for only 60 seconds, then finish on flat top or panini press to crisp tortilla.

WARNING! Slit the wrapper, but don't open it. Microwaving with no cut in the label will result in too much pressure, while an open wrapper will cause too much steam loss, slowing the heating process. Cook times vary by wattage.

HOT HOLDS: Heated burritos can be held at 140-150ºF for up to 4 hours. Burritos can't be cooled or heated again.

WE'RE HERE TO HELP! Cook settings may require further dialing in. Contact us at orders@disburrito.com for assistance.
